Dear PTMG,

We have been using Multi Seal in all our tractor and trailer tires for the past year and have seen drastic improvements with our maintenance costs because of it. Our tire costs have been cut down by 40 percent since we began installing the sealant. We are no longer seeing tires come in to the yard worn unevenly or low on air pressure. In the past we have not been able to consistently get high mileage out of our tires because of uneven wear due to low air pressures. This problem has been virtually eliminated with the Multi Seal. Since the first installation of the sealant, we have, as of today, not had to replace any tire containing the sealant due uneven wear patterns. As far as maintenance goes, this is the best investment our company has made in the effort to reduce costs. We plan to continue using the sealant in all of our tires.

Sincerely,

Jeremy Beck
Transportation Safety Coordinator
